Created : 980609 Last updated: 980611 A number of different ways have been used by a number of different people to "lift" their cars. Ramps and jacks have been used. And even where to place the jack stands (or not even using jack stands at all) have been debated. What follows is neither absolute nor perfect, but it is something that has actually be used in

### **300ZX - Engine**

One of the best chains for engine lifting is a

## Get Free 300zx Engine Lift Points

trailer security chain. These 1/4" chains have hooks on both ends and are stout enough to handle a 5-600-pound engine without any issue due to the 5,000 lbs. working strength. Unless your engine has loops for hooks (and the hooks have security clips), do not use the hooks to pull the engine.

I pull the intake manifold and bolt the engine hoist to the holes at the 4 corners where the manifold bolts in place. If you've only got 2 points, I believe the preferred technique is to use the alternator/AC bracket and there's a loop at the rear passenger side of the block where the engine harness plugs are are located.
