This type of air conditioner wall unit is easy to install and operate. Many units even come with remote controls, so you can control the temperature of the room from wherever you are sitting. Many models also feature easy-to-change filters, programmable thermostats, fan-only speeds, and 24-hour on/off delay timers.

Through The Wall Air Conditioners | P.C. Richard & Son

Friedrich Through-the-Wall Air Conditioners. Through-the-wall air conditioners are designed to install through a wall, instead of through a window. They're a great option as a primary source of cooling and heating or can be used to supplement central A/C in other applications.

Residential Through-The-Wall Air Conditioners | Friedrich

Central air is also a quieter solution to cool your home because the loudest parts are usually outside. There are two major types of air conditioners that you can have installed. The first is a packaged central air conditioner. This is a system where the entire unit is installed in a large cabinet usually on a concrete slab near your home. The return and supply ducts are run through the home's walls and connect with the unit outside.
