### **How To Use Nikon AUTO ISO in Manual Mode? (BEST Auto ISO ...**

The Auto ISO Mode is a feature on some cameras where the camera decides what should be the optimum ISO for the exposure. The camera reads the aperture and the shutter speed in use and then depending on the scene and the metering mode, dials in the ISO number it feels is right. Typically, the photographer sets the ISO, but in some situations, it is best to hand over the decision-making process to the camera and switch to the Auto ISO Mode.

### **How to Set Your Camera to Auto ISO Mode (And When to Use it)**

Auto ISO works in Manual mode as well. So let's say you're shooting a sporting event, and you want really fast shutter speeds no matter what. Let's say 1/1000 second. On older cameras (like on my Canon 6D) in the Auto ISO settings, there's no 1/1000 second minimum shutter speed. But you can "hack" the system. put the camera into Manual mode
