### Cdc Case Study Answers Ovarian

CDC-EIS 2003: OCs and Ovarian Cancer (811-703) - Student's Guide page 12 In the introduction to this case study, pregnancy was described as apparently protective against ovarian cancer. The investigators were interested in seeing whether the association between OC use and ovarian cancer differed for women of different parity. Table 3 shows

### Oral Contraceptive Use and Ovarian Cancer

This case is of benign ovarian cysts in a young, overweight female who was in her early 20s at the time of presentation with complaints of increasing abdominal girth and weight gain, for which she initially blamed her overweight body and diet, thus a 6 months' delay in seeking medical attention.

### Case Study of Ovarian cysts - MEDizzy Journal

An initial analysis of an ongoing, multicenter case-control study indicates that women who have used oral contraceptives are approximately half as likely to develop ovarian and endometrial cancer as women who have never used them and that, despite previous concerns, contraceptive use does not appear to increase a woman's risk of breast cancer.

### Oral Contraceptives and Cancer Risk

To study the relationship between oral contraceptive use and ovarian cancer (as well as breast and endometrial cancer), CDC initiated a case-control study – the Cancer and Steroid Hormone (CASH) Study in 1980. Case-patients were enrolled through eight regional cancer registries participating in the Surveillance, Epidemiology, and End Results (SEER) program of the National Cancer Institute.
