**COMPUTER PACKAGES TRAINING NOTES - KENYA**

The motherboard is the most important part of a computer. Every other computer part connects to the motherboard. If the motherboard does not work, none of the other parts will either. The cpu or processor is the computer's brain. It is in charge of telling your computer what computer processes to do and when to do them.

**The Ultimate Computer Repair Guide - St0rage.org**

A reference manual format is devoted to explaining the individual features of a software application (button, tab, field, and dialog box) and how they work. Many help files are written in this format, particularly context-sensitive help that displays a relevant topic whenever a user clicks the Help button on a particular screen. [4]
