### Engineering Graphics

An engineering drawing is a type of technical drawing that is used to convey information about an object. A common use is to specify the geometry necessary for the construction of a component and is called a detail drawing. Usually, a number of drawings are necessary to completely specify even a simple component. The drawings are linked together by a master drawing or assembly drawing which gives the drawing numbers of the subsequent detailed components, quantities required, construction materia

### Engineering drawing - Wikipedia

Engineering graphics is the creation of engineering drawings. These are representations of physical objects/locations on paper (or in 2 dimensional or 3 Dimensional electronic format). In a typical introductory engineering graphics course it covers the basics of drawing view creation (left side, right side, etc.), presantantation of lines (Hidden, no hidden) and projections such as isometric.
