Blind contour drawing is a favorite with drawing teachers to develop hand-eye communication. Contour drawing is essentially outline drawing, and blind contour drawing means drawing the outline of the subject without looking at the paper while you're doing it. The end result doesn't matter so much - that's not the point. What is important is the way blind contour drawing gets your mind off ...

Use an HB pencil to draw a rectangle slightly longer than a square. Make a slope at the top. The right side of the curve will dip down much lower than the left side since we are drawing the back of the right hand. Taper the right side of the rectangle as well. Step 2: Draw five circles

### How to draw hands part 1 - Construction | RapidFireArt

The first step is to trace your hand onto the paper. I recommend using a pencil to outline your hand first, so that you can erase any mistakes. Then go over the outline with a pen or marker. Tip: Be sure to spread your fingers far enough apart so that you can easily get the pencil in between your fingers.
