Skeletal muscle fibers are multinucleate cells that are long and thin. A motor unit is a unit that is a combination of a motor neuron and all of its connections with muscle cells. A skeletal muscle twitch is a contraction of an entire muscle. An electrical stimulus is an electrical impulse from the nervous system that

During an isometric contraction Your  
answer : a. the force generated by the  
skeletal muscle is greater than the load  
it is moving. Correct answer: d. the  
skeletal muscle is generating force, but  
it remains at a fixed length.
